

Dremel MultiPro 395 Carbon Brushes Replacement

Often the carbon brushes on the MultiPro will wear down and need replacing.

Written By: Matthew Satton

INTRODUCTION

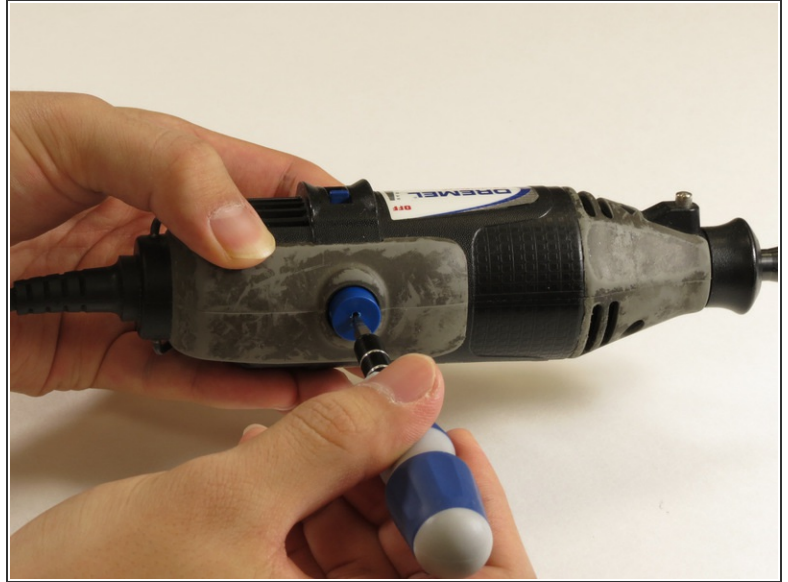

This guide will show how to replace damaged or dirty carbon brushes in the Dremel MultiPro 395.

TOOLS:

- [3mm Flathead Screwdriver](#) (1)
-

Step 1 — Remove the Blue Caps

- Remove the blue caps located on either side of the MultiPro using a 3 mm flathead screwdriver.

Step 2 — Remove the Carbon Brushes

- Carefully remove the carbon brushes attached at the end of the springs by gently pulling on the springs using your hands.

Step 3 — Insert New Carbon Brushes

- Carefully insert the new carbon brushes into the location of the old carbon brushes using your hands.

To reassemble your device, follow these instructions in reverse order.
